ClearPoint Neuro Reports Fourth Quarter and Full Year 2024 Results

Achieved Record Revenue for 2024 and Growth of 31%; Reduced 2024 Operational Cash Burn by 35%

SOLANA BEACH, CA, February 26, 2025 – ClearPoint Neuro, Inc. (Nasdaq: CLPT) (the "Company"), a global device, cell, and gene therapy-enabling company offering precise navigation to the brain and spine, today announced financial results for its fourth quarter and full-year ended December 31, 2024.

2024 Full Year and Fourth Quarter Highlights

- •Reported fourth quarter 2024 revenue of \$7.8 million, a 14% year-over-year increase compared with the fourth quarter of 2023;
- •Reported revenue of \$31.4 million for the full year 2024, an increase of 31% over 2023 and representing the tenth consecutive year of growth;
- •Overall product revenue, including biologics and drug delivery, grew 76% to \$18.6 million for the full year as a result of the SmartFrame OR™ platform and ClearPoint Prism® Laser Therapy System and partner progression in clinical trials;
- •Activated six new global centers in the fourth quarter for a total of 25 new centers in 2024, approximately three times our historic activation rate;
- •Continued patient enrollment in numerous cell and gene therapy trials for partners selected in FDA expedited review programs across multiple indications;
- •Full early repayment of the principal amount and interest on a \$10 million convertible note leaving the Company with no outstanding debt;
- •Quarterly operational cash burn of \$1.2 million, bringing total 2024 operational cash burn of \$9.0 million, a reduction of 35% versus 2023; and
- •Reported cash and cash equivalents totaling \$20.1 million as of December 31, 2024.

"2024 represented the strongest financial and strategic performance in our history including more than 30% revenue growth, and a 35% reduction in operational cash burn," commented Joe Burnett, President and CEO at ClearPoint Neuro. "Very importantly we feel that we have entered the next phase of ClearPoint as a company, a phase that we call "Fast. Forward." This new phase will be represented by three key strategic initiatives. First, we will extend our lead as the premier drug delivery partner for neuro disorders by continuing to build the leading solution in the drug delivery ecosystem including hardware, software, routes-of-administration, clinical support and preclinical drug development services. We will provide best-in-class support to our more than 60 current BioPharma partners as they progress through the global regulatory process to commercialization, including several already selected for expedited review in the United States. Second, we will expand our global footprint and regulatory clearances so that we create worldwide capacity for patients who will benefit from these new cell

and gene therapies as they become available. Third, we will accelerate the launch of new fast, simple and predictable products for both the MRI Suite and the Operating Room, increasing hospital throughput and driving sales and scale in our existing accounts. We will train sites on the use of the ClearPoint Neuro technology in both the MRI Suite and the OR to build universal familiarity with our drug delivery ecosystem in anticipation of cell and gene therapy commercialization in the coming years. Everything we do will be to help physicians and hospitals prepare for these regenerative cell and gene therapies that have the potential to transform the treatment for these severe neuro disorders and restore quality of life to countless patients and their families."

Business Outlook

The Company estimates revenue in 2025 to be between \$36.0 million and \$41.0 million, representing growth between 15% and 31%.

Financial Results – Year Ended December 31, 2024

Total revenue was \$31.4 million and \$24.0 million for the years ended December 31, 2024 and 2023, respectively.

Biologics and drug delivery revenue, which includes sales of disposable products and services related to customer-sponsored preclinical and clinical trials utilizing our products, increased 27% to \$17.3 million for the year ended December 31, 2024, from \$13.6 million for the same period in 2023. This increase is attributable to a \$3.5 million increase in product revenue resulting from higher demand for disposables as multiple partners progress in their trials, and a \$0.3 million increase in service and other revenue related to new preclinical trials and service agreements entered into with our partners for the year ended December 31, 2024, compared to the same period in 2023.

Neurosurgery navigation and therapy revenue, which primarily consists of disposable product commercial sales related to cases utilizing the ClearPoint system, increased 21% to \$10.3 million during the year ended December 31, 2024, from \$8.5 million for the same period in 2023. Product revenue increased \$2.7 million, or 36%, resulting from newly activated accounts, increased case count, and new product offerings, including SmartFrame OR and Prism Laser Therapy, compared to the same period in 2023. This was partially offset by a decrease in service and other revenue of \$0.9 million primarily as a result of pausing a co-development program with one of our Brain Computer Interface partners.

Capital equipment and software revenue, consisting of sales of ClearPoint reusable hardware and software and related services, increased 107% to \$3.8 million for the year ended December 31, 2024, from \$1.8 million for the same period in 2023, due to an increase in the placements of ClearPoint navigation capital equipment and software and Prism laser units.

The Company achieved a gross margin of 61% on its sales for 2024, compared to a gross margin of 57% for 2023. The increase in gross margin was primarily due to lower costs for the year ended December 31, 2024 due to the transition to the new manufacturing facility, occurring in 2023, and higher volumes for the year ended December 31, 2024.

Operating expenses were \$38.9 million for the full year 2024, compared with \$36.1 million for 2023, an increase of 8%. The increase was mainly driven by higher personnel-related expenses, including share-based compensation, as we increased headcount to fuel the expansion of the research and development, clinical, and support organizations, partially offset by a decrease in the allowance for credit losses as a result of subsequent recoveries and lower development costs as a result of reprioritization of certain initiatives.

Financial Results - Quarter Ended December 31, 2024

Total revenue was \$7.8 million for the three months ended December 31, 2024, in comparison to \$6.8 million for the three months ended December 31, 2023, representing an increase of \$1.0 million, or 14%.

Biologics and Drug Delivery revenue, which includes sales of services and disposable products related to customer-sponsored preclinical and clinical trials utilizing our products, increased 4% to \$4.2 million for the three months ended December 31, 2024, from \$4.1 million for the same period in 2023. The growth is attributable to a \$0.6 million increase in product revenue resulting from higher demand for disposables as multiple partners progress in their trials, partially offset by a decrease of \$0.4 million in service and other revenue due to a lower number of preclinical studies performed.

Neurosurgery Navigation and Therapy revenue, which primarily consists of disposable product commercial sales related to cases utilizing the ClearPoint system, increased 43% to \$2.9 million for the three months ended December 31, 2024, from \$2.0 million for the same period in 2023. The increase is driven by higher product revenue resulting from newly activated accounts, increased case count, and new product offerings, including the SmartFrame OR and Prism Laser Therapy, during the three months ended December 31, 2024, compared to the same period in 2023.

Capital equipment and software revenue, consisting of sales of ClearPoint reusable hardware and software and related services, decreased slightly to \$0.6 million for the three months ended December 31, 2024, from \$0.7 million for the same period in 2023.

Gross margin for the three months ended December 31, 2024, was 61% compared to a gross margin of 59% for the three months ended December 31, 2023.

Operating expenses for the fourth quarter of 2024 were \$10.4 million, compared to \$8.7 million for the fourth quarter of 2023. The increase was mainly driven by higher personnel costs, research and development, and regulatory fees.

At December 31, 2024, the Company had cash and cash equivalents totaling \$20.1 million as compared to \$23.1 million at December 31, 2023, with the decrease resulting from the full repayment of debt of \$10 million and the use of cash in operating activities of \$9.0 million in the year ended December 31, 2024, partially offset by the net proceeds from the public offering of common stock of \$16.2 million in the first quarter of 2024.

Teleconference Information

Investors and analysts are invited to listen to a live broadcast review of the Company's fourth quarter and full year 2024 results on Wednesday, February 26, 2025 at 4:30 p.m. Eastern time (1:30 p.m. Pacific time) which may be accessed online here: https://event.choruscall.com/mediaframe/webcast.html? webcastid=2j7boq1J. Investors and analysts who would like to participate in the conference call via telephone may do so at (877) 407-9034, or at (201) 493-6737 if calling from outside the U.S. or Canada.

For those who cannot access the live broadcast, a replay will be available shortly after the completion of the call until March 28, 2025, by calling (877) 660-6853 or (201) 612-7415 if calling from outside the U.S. or Canada, and then entering conference I.D. number 413671. An online archive of the broadcast will be available on the Company's Investor website at https://ir.clearpointneuro.com/.

About ClearPoint Neuro

ClearPoint Neuro is a device, cell, and gene therapy-enabling company offering precise navigation to the brain and spine. The Company uniquely provides both established clinical products as well as preclinical development services for controlled drug and device delivery. The Company's flagship product, the ClearPoint Neuro Navigation System, has FDA clearance and is CE-marked. ClearPoint Neuro is engaged with healthcare and research centers in North America, Europe, Asia, and South America. The Company is also partnered with the most innovative pharmaceutical/biotech companies, academic centers, and contract research organizations, providing solutions for direct CNS delivery of therapeutics in preclinical studies and clinical trials worldwide. To date, thousands of procedures have been performed and supported by the Company's field-based clinical specialist team, which offers support and services to our customers and partners worldwide. For more information, please visit www.clearpointneuro.com.

Forward-Looking Statements

Statements in this press release and in the teleconference referenced above concerning the Company's plans, growth and strategies may include forwardlooking statements within the context of the federal securities laws. Statements regarding the Company's future events, developments and future performance, the size of total addressable markets or the market opportunity for the Company's products and services, the Company's expectation for revenues, operating expenses, the adequacy of cash and cash equivalent balances to support operations and meet future obligations, as well as management's expectations, beliefs, plans, estimates or projections relating to the future, are forward-looking statements within the meaning of these laws. These forward-looking statements are based on management's current expectations and are subject to the risks inherent in the business, which may cause the Company's actual results to differ materially from those expressed in or implied by forward-looking statements. Particular uncertainties and risks include those relating to: macroeconomic and inflationary conditions; regulatory and policy uncertainty; the introduction of or changes in tariffs, sanctions, or trade barriers; changes in monetary policy; geopolitical trends, such as protectionism and economic nationalism; future revenue from sales of the Company's products and services; the Company's ability to market, commercialize and achieve broader market acceptance for new products and services offered by the Company; the ability of our biologics and drug delivery partners to achieve commercial success, including their use of the Company's products and services in their delivery of therapies; the Company's ability to maintain its current relationships with biologics and drug delivery partners or enter into new relationships with such partners; the Company's expectations, projections and estimates regarding expenses, future revenue, capital requirements, and the availability of and the need for additional financing; the Company's ability to obtain additional funding to support its research and development programs; the ability of the Company to manage the growth of its business; the Company's ability to attract and retain its key employees; and risks inherent in the research, development, and regulatory approval of the Company's new products and the new products of its biologics and drug delivery partners. More detailed information on these and additional factors that could affect the Company's actual results are described in the "Risk Factors" section of the Company's Annual Report on Form 10-K for the year ended December 31, 2023, and the Company's Quarterly Report on Form 10-Q for the three months ended September 30, 2024, both of which have been filed with the Securities and Exchange Commission, and the Company's Annual Report on Form 10-K for the year ended December 31, 2024, which the Company intends to file with the Securities and Exchange Commission on or before March 31, 2025. The Company does not assume any obligation to update these forward-looking statements.

DISCLAIMER

This presentation and discussion contain forward-looking statements within the context of the federal securities laws, including the Company's expectation for revenues, gross margin, the adequacy of cash and cash equivalent balances to support operations and meet future obligations, the future market of its products and services, and other performance and results. These forward-looking statements are based on management's current expectations and are subject to the risks inherent in the business, which may cause the Company's actual results to differ materially from those expressed in or implied by forward-looking statements. Particular uncertainties and risks include those relating to: macroeconomic and inflationary conditions; the introduction of or changes in tariffs, sanctions, or trade barriers; changes in monetary policy; geopolitical trends, such as protectionism and economic nationalism; future revenue from sales of the Company's products and services; the Company's ability to market, commercialize and achieve broader market acceptance for new products and services offered by the Company; the ability of our biologics and drug delivery partners to achieve commercial success, including their use of the Company's ability to maintain its current relationships with biologics and drug delivery partners or enter into new relationships with biologics and drug delivery partners or enter into new relationships with such partners; the Company's expectations, projections and estimates regarding expenses, future revenue, capital requirements, and the availability of and the need for additional financing; the Company's ability to obtain additional funding to support its research and development programs; the ability of the Company's ability to actual results are described in the "Risk Factors" section of the Company's actual results are described in the "Risk Factors" section of the Company's Annual Report on Form 10-K for the year ended December 31, 2023, and the Company's Annual Report on Form 10-K or the year ende

OUR COMPANY

We Enable Cell, Gene and Device Therapies by Offering Precise Navigation to the Brain and Spine

Our Unique Platform Includes Both Proven Clinical Products Used by Neurosurgeons, and Drug Development Services Used by BioPharma Partners

CLEARPOINT NEURO EXECUTIVE SUMMARY

A \$10B POTENTIAL MARKET DIVERSIFIED ACROSS 60+ PARTNERS, 20+ INDICATIONS*

A UNIQUE PLATFORM TECHNOLOGY USED FOR CELL AND GENE THERAPY DELIVERY

15+ years building a complete drug delivery ecosystem including navigation solutions, predictive modeling, delivery devices, infusion monitoring software and clinical case support

Combination device success, proprietary technology and deep FDA experience provide our BioPharma partners with a meaningful head start, and our investors with a Portfolio-like biotech strategy

100+ ACTIVE GLOBAL CENTERS

An expanding global installed base of regional treatment centers are scaling capacity to be ready for additional cell and gene therapy patients to be treated with a unified platform

CURRENT PORTFOLIO PROVIDES ACCESS TO A ≈\$500M MARKET OPPORTUNITY TODAY

Evolved beyond the MRI and into operating room CT navigation, laser ablation therapy, surgical access tools and preclinical CRO services which fuel growth via new product launches and provide path to profitability

A GROWING & PASSIONATE TEAM

Our dedicated team of engineers, scientists and clinical specialists wake up every morning focused on the future of neurosurgery and drug delivery - This is all that we do...

© 2025 CLEARPOINT NEURO

*Including indications for all cell, gene, and device therapies enabled by ClearPoint Neuro technologies

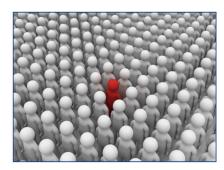

4

The Future of Cell and Gene Therapy is Not Coming... It is HERE TODAY

More than 30 million people in the U.S. are estimated to suffer from severe and debilitating neurological disorders:

- Parkinson's Disease (≈1,000,000)
- Essential Tremor (≈7,000,000)
- **Epilepsy** (≈2,900,000)
- Huntington's Disease (≈41,000)
- Rare Childhood Genetic Disorders (≈25,000)
- Dementia and Alzheimer's Disease (≈6,900,000)
- Tumor and Glioblastoma (≈280,000)
- Severe OCD (≈1,000,000)
- Treatment Resistant Depression (≈2,900,000)
- ALS and Spinal Cord Injury (≈300,000)
- Stroke Rehabilitation (≈7,000,000)
- Neuropathic Pain (≈2,000,000)

Neurological diseases cost Americans nearly \$800 billion annually. The only way to decrease these costs is to improve treatment.

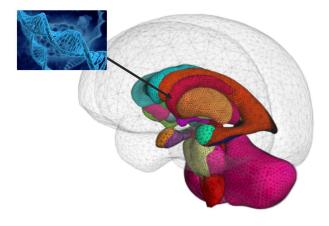

Despite some available treatments, very few of these patients undergo a direct surgical intervention to improve their quality of life...

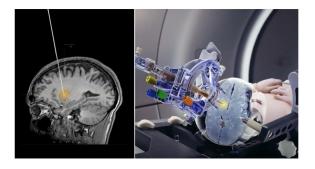

The Future of Cell and Gene Therapy is Not Coming... It is HERE TODAY

Our Goal is to Help More Patients by Addressing Two Primary Barriers to Treatment

We will partner to Develop Device, Cell and Gene Therapies that may <u>cure</u> the underlying disease and restore function...

We will Enable fast, minimally invasive, asleep procedures for a more comfortable and predictable patient experience...

The Future of Cell and Gene Therapy is Not Coming... It is HERE TODAY

Partner has received FDA approval for a neuro gene therapy that is co-labeled with ClearPoint

FDA NEWS RELEASE

FDA Approves First Gene Therapy for Treatment of Aromatic L-amino Acid Decarboxylase Deficiency

For Immediate Release:

November 14, 2024

The U.S. Food and Drug Administration approved Kebilidi (eladocagene exuparvovec-tneq), an adeno-associated virus vector-based gene therapy indicated for the treatment of adult and pediatric patients with aromatic L-amino acid decarboxylase (AADC) deficiency. Kebilidi is the first FDA-approved gene therapy for treatment of AADC deficiency.

"Clinical advancements in the field of gene therapy continue to lead to the discovery and availability of innovative treatment options for rare diseases that are otherwise difficult to manage," said Peter Marks, M.D., Ph.D., director of the FDA's Center for Biologics Evaluation and Research (CBER). "Today's approval underscores our commitment to help make safe and effective treatments available for patients in need."

The FDA also authorized the SmartFlow Neuro Cannula, an infusion tube inserted into a target in the brain (parenchymal tissue), to deliver Kebilidi. The SmartFlow Neuro Cannula is currently the only FDA authorized device indicated for use to administer Kebilidi. The FDA granted authorization of the SmartFlow Neuro Cannula to ClearPoint Neuro, Inc.

Partners have programs selected for expedited review - the FDA recognizes the urgency

The Future of Cell and Gene Therapy is Not Coming...it is HERE TODAY

7 Active Clinical-Stage Partners have been selected for expedited review, including:

	Indication	RMAT	Fast Track	Clinical Status
PTC	AADC Deficiency	-	-	Approved
uniQure	Huntington's Disease	✓	-	Trials in US, EU
BlueRock	Parkinson's Disease	\checkmark	-	Trials in NorthAm

In 2025 Our Journey Enters the NEXT CHAPTER

2010 - 2020

Discovery. Design.

- Neurosurgeon-Led Ideation
- Unique MRI Navigation
- Initial FDA Clearance and Product Revenue
- Accumulation of Clinical Trial Experience Using SmartFlow
- Maestro A.I. Software Development
- Initial IP Generation and Licenses
- NASDAQ Listed

2021 - 2024

Funded. Foundation.

- 100+ Activated Customers
- 60+ Biopharma Partners
- 20+ Potential Disease Indications*
- Preclinical Team Creation
- Operating Room Product Launch
- Laser Therapy Product Launch
- 100+ Owned & Licensed Patents
- EU MDR Certification
- Expanded, Audit-Ready Manufacturing in California
- Leadership Team Complete

2025 - 2027

Fast. Forward.

- Grow into an estimated, existing \$500M Market Opportunity
- 150 Activated Customers
- First Commercial CGT Launched
- GLP Preclinical Capability
- Operating Room Nav Growth
- · Laser Therapy Growth
- MR Drill and Access Growth
- · 'Harmony' Software Launch
- New Routes of Administration
- · Operational Cash Breakeven

2028+

Essential. Everywhere.

- \$10B Potential Revenue Opportunity
- 'Combination Product' Regulatory
 Designation for multiple cell and gene
 therapy indications
- Meaningful Revenue from Sophisticated BioPharma Deal Structures beyond product sales including royalty and milestone payments, co-development
- One Unified Platform with both MR and Operating Room Capability and Workflows
- Additional Global Regulatory Approvals Beyond the U.S. and E.U.

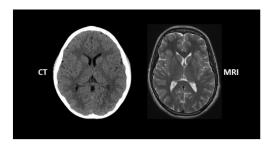

Our Start: Unique Neurosurgery Navigation Guided by Live MRI

Neurosurgery has traditionally been done via open craniotomy or by using CT guidance in the operating room

The historical limitations of CT accuracy would often require patients to remain awake for hours-long brain surgery to confirm the location and impact of technologies like DBS

ClearPoint believed that building a navigation system that could harness the power of live MRI would be accurate enough that the patient could be comfortably asleep for this minimally invasive procedure

The ClearPoint SmartFrame family of products uses MR-safe materials and enables surgeons to Decide, Guide & Confirm using live MR Imaging to achieve sub-millimetric accuracy

Our Start: Decide, Guide & Confirm

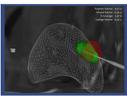

Pre-Plan Trajectory and DECIDE **Entry Point**

Automatically **G U I D E Precision Adjustments** Prior to Insertion

CONFIRM Quality of Delivery Into Permanent Record

Three Primary Use Cases demonstrate the value of the ClearPoint Neuro Navigation System:

- 1. Functional neurosurgeons could confidently place DBS electrodes with the patient comfortably asleep
- 2. Neuro-oncologists could perform **entire tumor laser** ablations in one room instead of having to transport the patient from the OR to the MRI
- 3. BioPharma researchers could confirm that cell and gene therapies are not only delivered to a precise location, but could also confirm proper coverage of the target structure before closing the patient

Our Start: Assemble the Building Blocks

Leveraging our unique platform and dedicated team, we developed and acquired essential technologies necessary to complete the entire ecosystem for MR-Guided Navigation with a focus on cell and gene therapy delivery

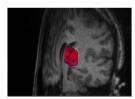

SmartFrame XG and Surgical Accessory Kit

ClearPoint Maestro Brain Model

Segmentation and Image Fusion

3D Peri-procedural Infusion Monitoring Software (Investigational Use Only)

Radial Branching Cell Therapy Devices and Spinal Infusion Anchors (Investigational Use Only)

Biophysical Modeling of patient specific drug infusions (Investigational Use Only)

Funded. Foundation.

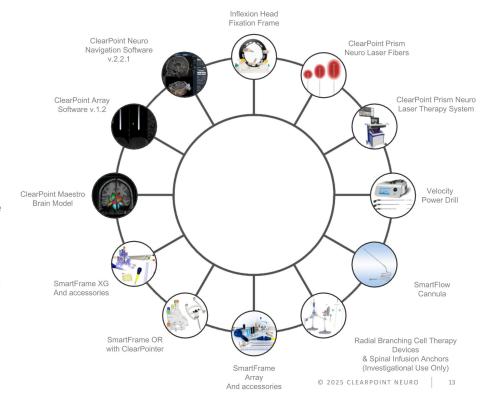

Building the Business

ClearPoint Neuro built a complete and unique ecosystem of clinical and preclinical products and has achieved regulatory approvals in multiple geographies

This proven technology has more than 10 years of experience and been used in more than 7,000 procedures to date

Demand for our platform has grown driven by the promise of cell and gene therapies, new DBS indications, and the expansion of laser therapy

ClearPoint Neuro activated a record 25 new Global Customers in 2024

Building the Business: Our Four-Pillar Growth Strategy Remains Our Foundation

Building the Business

We have invested in the Development, Quality and Supply infrastructure to build confidence for both hospitals and BioPharma partners

We are not a start-up company but an experienced and sophisticated medical device extension for any cell and gene therapy company

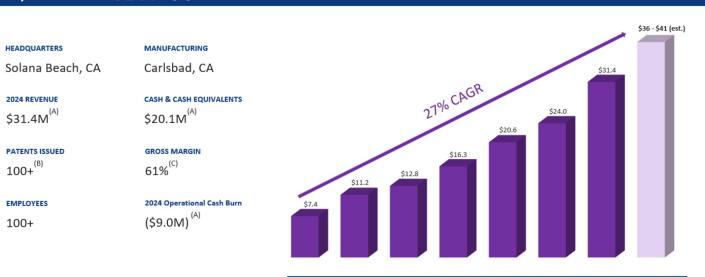

ClearPoint Neuro assets available to our partners:

- HQ & Training Facility in Solana Beach, California
- Research Laboratory in San Diego, California
- Manufacturing Facility in Carlsbad, California
- ISO 13485 / MDSAP / EU MDR Certified QMS
- Significant and positive experience with BioPharma Audits, FDA and Global Notified Body inspections

In 2025 Our Journey Enters the NEXT CHAPTER

2010 - 2020

Discovery. Design.

- Neurosurgeon-Led Ideation
- Unique MRI Navigation
- Initial FDA Clearance and Product Revenue
- Accumulation of Clinical Trial Experience Using SmartFlow
- Maestro A.I. Software Development
- Initial IP Generation and Licenses
- NASDAQ Listed

2021 - 2024

Funded. Foundation.

- 100+ Activated Customers
- 60+ Biopharma Partners
- 20+ Potential Disease Indications*
- Preclinical Team Creation
- Operating Room Product Launch
- Laser Therapy Product Launch
- 100+ Owned & Licensed Patents
- EU MDR Certification
- Expanded, Audit-Ready Manufacturing in California
- Leadership Team Complete

2025 - 2027

Fast. Forward.

- Grow into an estimated, existing \$500M Market Opportunity
- 150 Activated Customers
- First Commercial CGT Launched
- GLP Preclinical Capability
- Operating Room Nav Growth
- · Laser Therapy Growth
- MR Drill and Access Growth
- · 'Harmony' Software Launch
- New Routes of Administration
- · Operational Cash Breakeven

2028+

Essential. Everywhere.

- \$10B Potential Revenue Opportunity
- 'Combination Product' Regulatory
 Designation for multiple cell and gene
 therapy indications
- Meaningful Revenue from Sophisticated BioPharma Deal Structures beyond product sales including royalty and milestone payments, co-development
- One Unified Platform with both MR and Operating Room Capability and Workflows
- Additional Global Regulatory Approvals Beyond the U.S. and E.U.

We are Pointing the Way for a Cell and Gene Therapy Future: Fast. Forward.

Our commitment to hospitals & BioPharma partners is to help prepare for tens-of-thousands of anticipated new patients who will be seeking these restorative therapies

- 1. Extend Our Lead in Neuro Drug Delivery by leveraging our complete and unique ecosystem of both products and drug development services
- 2. Evolve our Portfolio to focus on fast, simple, predictable procedures in both the MRI and Operating Room to increase hospital throughput
- 3. Expand our Base of global activated centers to increase capacity and ensure access of these novel cell and gene therapies

Fast. Forward.

OUR FOUR PILLAR GROWTH STRATEGY

CONTINUES 2025-2027

GLOBAL SCALE

Expand Global Footprint to 150+ Centers Perform Procedures w/ Remote Clinical Support Show path to 70%+ Margins & Cashflow Breakeven

LASER THERAPY & ACCESS
Add 1.5 Tesla PRISM for full market access Add Ablation Coverage & Predictive Thermal Modeling Launch MRI Conditional Power Drill to reduce procedure time

NEUROSURGERY NAVIGATION
Show Compatibility with Existing Third-Party Navigation w/ SmartFrame OR
Expand into the Operating Room w/ ClearPoint Duet and 3.0 Software
Launch Maestro CT, Non-Rigid Fusion, Area-of-Activation and DTI Harmony Software

BIOLOGICS & DRUG DELIVERY

Expand Neuro Preclinical CRO Services and Capacity to include larger GLP Study Capability
Expand Partnerships to Include Co-Development, Commercial Pricing, Drug Clinical Milestones & Royalty Based Agreements
Execute on Development Pipeline for Drug Infusion Monitoring/Modelling, Intracranial Cell Therapy and Spinal Routes of Administration

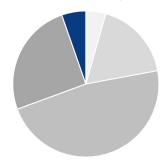

2025

2027

GLP Services & New Routes of Administration

2025 Estimated Preclinical & Clinical TrialMarket (≈\$300M)

- Consulting, Bench Testing and Co-Development Services
- Pilot Pre-Clinical Testing (non-GLP)
- FDA Submission Preclinical Testing (GLP)
- Clinical Trial Products & Support Services
- Current CLPT Share

Estimated Market Size, Growth Drivers, and Share Drivers are based on internal estimates and assumptions, market trends, and customer insights. Assumptions may not reflect actual future performance.

Market Growth Drivers:

- Improved BioPharma funding environment
- Additional cell and gene therapies entering the 'funnel'
- Partner progression into larger spend GLP studies and clinical trials
- Successful implementation of FDA 'Expedited Review' pathways including RMAT offering faster clinical trials and less capital required

Market Share Drivers:

- Addition of GLP capability and increased study capacity
- Expansion to ClearPoint Advanced Laboratories ('CAL')
- Product portfolio expansion including new routes of administration
- More custom-development and strategic partnerships w/ BioPharma

(Expected 2H 2025)

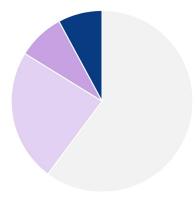

Coverage Estimation and Biophysical modeling (Investigational Use Only)

150 active cell and gene therapy programs globally 7.5 years average program duration 200 patients studied clinically on average as part of trials

Fast. Forward.

Neuro Navigation, Therapy and Access Product Growth

2025 Estimated Neuro Navigation, Laser Therapy & Cranial Access Market (≈\$200M)

■ Neuro Navigation ■ LiTT Devices ■ Cranial Access Devices ■ CLPT Share

Estimated Market Size, Growth Drivers, and Share Drivers are based on internal estimates and assumptions, market trends, and customer insights. Assumptions may not reflect actual future performance

Market Growth Drivers:

- Asleep DBS FDA Clearance and Patient Awareness
- New DBS Indications including Epilepsy, OCD, Depression, BCI
- Increased hospital throughput of laser therapy compared to open
- Improved laser insurance decisions and awareness
- Additional global approvals

Market Share Drivers:

- 3.0 Software for proficient, mirrored CLPT workflow in the MRI and OR
- Asleep, simultaneous workflows for fast procedures, low radiation
- 1.5 Tesla PRISM Laser approval for full market access
- Velocity Alpha MR Drill for faster cranial access times

SmartFrame OR and ClearPointer™

1.5 Tesla PRISM (Expected 2H 2025)

w/ CT Functionality (FDA Cleared January 2025)

SmartFrame DUET w/ flexible MRI & CT workflows

(Expected 2026)

In 2025 Our Journey Enters the NEXT CHAPTER

The FDA & Global Notified Bodies Recognize the Urgency

Partner has received FDA approval for a neuro gene therapy that is co-labeled with ClearPoint

FDA NEWS RELEASE

FDA Approves First Gene Therapy for Treatment of Aromatic L-amino Acid Decarboxylase Deficiency

For Immediate Release:

November 14, 2024

The U.S. Food and Drug Administration approved Kebilidi (eladocagene exuparvovec-tneq), an adeno-associated virus vector-based gene therapy indicated for the treatment of adult and pediatric patients with aromatic L-amino acid decarboxylase (AADC) deficiency. Kebilidi is the first FDA-approved gene therapy for treatment of AADC deficiency.

"Clinical advancements in the field of gene therapy continue to lead to the discovery and availability of innovative treatment options for rare diseases that are otherwise difficult to manage," said Peter Marks, M.D., Ph.D., director of the FDA's Center for Biologics Evaluation and Research (CBER). "Today's approval underscores our commitment to help make safe and effective treatments available for patients in need."

The FDA also authorized the SmartFlow Neuro Cannula, an infusion tube inserted into a target in the brain (parenchymal tissue), to deliver Kebilidi. The SmartFlow Neuro Cannula is currently the only FDA authorized device indicated for use to administer Kebilidi. The FDA granted authorization of the SmartFlow Neuro Cannula to ClearPoint Neuro, Inc.

Partners have programs selected for expediated review - the FDA recognizes the urgency

ClearPoint has 60+ Active BioPharma Programs across 20+ indications including DBS, LiTT

BENCHTOP TESTING

- Device Compatibility Testing
- Infusion Pump Testing
- Custom Device Development
- Performance Assessment
- Device Comparisons / Bridging

PRECLINICAL STUDIES

- Running Preclinical Studies
- Surgical Planning & Guidance
- Writing IACUC / Study Protocols
- Dosing and Surgical Support
- Post-Infusion Reporting

CLINICAL TRIALS

- Surgical Guidance
- Procedure Pre-Planning
- On-Site Clinical Support
- Inventory Management
- Data / Infusion Reporting

Sophisticated Partnerships are Enabled by the ClearPoint Ecosystem of Products & Services

We provide the creative flexibility to structure agreements as an essential and long-term supplier

ClearPoint May Provide to BioPharma: **ClearPoint May Secure from BioPharma:** Assurance of Supply **Demand Planning** Access to FDA Device Dossier

- Redundant Global Manufacturing
- **Contracted Commercial Pricing**
- Licenses to Key Intellectual Property
- Custom Device Development
- Clinical Specialist Procedural Support
- **Dedicated Inventory Locations**
- Extensive Audit Access & Experience
- Supply Continuity and Reliability

CLPT is like a Portfolio of BioPharma without drug development costs or binary outcomes

More than 30 million people in the U.S. are estimated to suffer from severe and debilitating neurological disorders:

- Parkinson's Disease (≈1,000,000)
- Essential Tremor (≈7,000,000)
- **Epilepsy** (≈2,900,000)
- Huntington's Disease (≈41,000)
- Rare Childhood Genetic Disorders (≈25,000)
- Dementia and Alzheimer's Disease (≈6,900,000)
- Tumor and Glioblastoma (≈280,000)
- Severe OCD (≈1,000,000)
- Treatment Resistant Depression (≈2,900,000)
- ALS and Spinal Cord Injury (≈300,000)
- Stroke Rehabilitation (≈7,000,000)
- Neuropathic Pain (≈2,000,000)

ClearPoint Neuro is Diversified Across:

- 60+ BioPharma Partners
- 20+ Indications including device, cell and gene therapies
- Redundant Partners for multiple indications
- Many Partners with multiple programs
- · Additional device treatments including DBS, Laser, BCI

Many shots on goal with a path to operational cash breakeven:

	Indication	RMAT	Fast Track	Clinical Status
PTC	AADC Deficiency	1-	-	Approved
uniQure	Huntington's Disease	✓	~	Trials in US, EU
BlueRock	Parkinson's Disease	✓	-	Trials in NorthAm
NEURONA THE RAPPEUTICS	Epilepsy (MTLE)	✓		Trials in the US
AskBio	Parkinson's Disease	✓	✓	Trials in US, EU
Aspen Aspen	Parkinson's Disease	-	✓	Trials in the US
AVIADOBIO	Frontotemporal Dementia	-	✓	Trials in US, EU

If just 1% of patients with diseases under expedited review are treated each year, at current ASPs that would yield more than \$250M in additional CLPT revenue

CLEARPOINT NEURO EXECUTIVE SUMMARY

A \$10B POTENTIAL MARKET DIVERSIFIED ACROSS 60+ PARTNERS, 20+ INDICATIONS*

A UNIQUE PLATFORM TECHNOLOGY USED FOR CELL AND GENE THERAPY DELIVERY

15+ years building a complete drug delivery ecosystem including navigation solutions, predictive modeling, delivery devices, infusion monitoring software and clinical case support

Combination device success, proprietary technology and deep FDA experience provide our BioPharma partners with a meaningful head start, and our investors with a Portfolio-like biotech strategy

100+ ACTIVE GLOBAL CENTERS

An expanding global installed base of regional treatment centers are scaling capacity to be ready for additional cell and gene therapy patients to be treated with a unified platform

CURRENT PORTFOLIO PROVIDES ACCESS TO A ≈\$500M MARKET OPPORTUNITY TODAY

Evolved beyond the MRI and into operating room CT navigation, laser ablation therapy, surgical access tools and preclinical CRO services which fuel growth via new product launches and provide path to profitability

A GROWING & PASSIONATE TEAM

Our dedicated team of engineers, scientists and clinical specialists wake up every morning focused on the future of neurosurgery and drug delivery - This is all that we do...

© 2025 CLEARPOINT NEURO

*Including indications for all cell, gene, and device therapies enabled by ClearPoint Neuro technologies
