## **MRI Interventions Reports Record ClearPoint® Cases and Disposable Functional Neurosurgery Revenue in Third Quarter**

IRVINE, CA, November 12, 2018 – MRI Interventions, Inc. (OTCQB: MRIC) (the “Company”) today announced financial results for its third fiscal quarter ended September 30, 2018.

### **Third Quarter 2018 and Recent Highlights**

- Total revenue for the third quarter was \$1.8 million, an increase of 5% versus the prior year quarter.
- Received total purchase orders of \$2.0 million in the quarter.
- Performed a record 175 ClearPoint cases, an increase of 19% compared with the preceding quarter and up 9% versus the prior year quarter.
- Reported a record \$1.4 million in functional neurosurgery revenue, which is made up of disposable SmartFrame kits, an increase of 13% over the prior year quarter.
- Gross margin increased to 69% for the quarter, compared with 60% in the prior year quarter.
- Cash used in operations was \$975,000, a favorable comparison to the previously communicated forecast of \$1.0 million and an improvement of 12% from \$1.1 million in cash used in the second quarter of 2018.
- Retired \$2.0 million in debt and extended another \$2.0 million of debt by 18 months, to September 2020.
- Acquired an exclusive, worldwide license to CLS’s laser ablation platform for neurosurgery and spine procedures, including a commitment to co-develop products designed to improve accuracy and efficiency, enabling physicians to perform multiple cases in a single day of MRI scanner time.
- Announced an additional agreement with CLS to distribute its laser ablation system in the U.S. and Canada for use beyond the previously announced neuro and spine procedures.
- Announced first clinical use of the SmartFlow® cannulae in a dosing clinical trial under Axovant Scientific’s Parkinson’s Disease gene therapy program.
- Announced a collaboration with Monteris Medical to build next generation head-fixation frame technology leveraging knowledge and intellectual property from both companies.

Joe Burnett, President and Chief Executive Officer of MRI Interventions, Inc., said, “The third quarter marked a terrific period with record ClearPoint cases and exciting execution against our four-pillar growth strategy. We made significant progress in each of these four pillars as we transform MRIC into a company that provides comprehensive solutions to help surgeons decide, guide, treat and confirm in clinical procedures where accuracy is paramount to outcomes and patient quality of life.

“In pillar one, functional neurosurgery, we reported record case volumes and record revenue in the quarter. Our marketing efforts increased the number of sites using our multiple procedures per day protocol from three to six and added an additional system placement. Furthermore, FDA clearance in October of Monteris’ new laser ablation probe should have an immediate positive impact on fourth quarter case volume, and we believe our headframe collaboration will further benefit patient mobility and procedure times when that joint product becomes commercially available in the coming years. Additionally, in November we received FDA clearance of our ClearPoint 2.0 next-generation software platform. We plan to immediately commence shipment and installation of ClearPoint 2.0 under a limited market release and expect it will be made available for purchase by all new and existing ClearPoint customers in the first half of 2019.

“In pillar two, biologics and drug delivery, we shipped \$103,000 of SmartFlow cannulae to Europe under our new CE Mark, which we received in the second quarter, with an additional \$49,000 in purchase orders to be shipped. Axovant’s Parkinson’s program progressed to a clinical dosing stage and the first treatment in that trial used our cannulae for gene delivery. Our partnership with Voyager Therapeutics continues to progress as five of our clinical specialists have been trained on the infusion and clinical procedure and will soon be able to cover clinical cases on behalf of Voyager once their Phase 2-3 study for Parkinson’s enrolls its first patient.

“In pillar three, therapy, we announced an agreement with Clinical Laserthermia Systems, AB (“CLS”) to acquire a worldwide license to their FDA-cleared Tranberg laser ablation system for use in neurosurgery and spine. This will allow us to co-develop hardware, disposables and software to make the ClearPoint platform work together with the Tranberg system in a single, coordinated and efficient workflow with the goals of increasing accuracy and reducing procedure time. We are now redeploying existing resources to these products. Adding laser therapy to our portfolio has the potential to turn our lowest revenue and margin procedure into our highest.

“And in pillar four, gaining global scale, our non-neuro distribution agreement with CLS for the U.S. and Canada enables additional operating cost leverage within our commercial infrastructure. Our clinical specialists will be able to cover local cases on non-neuro days, increasing their average cases per week and further reducing travel.

“Importantly, we accomplished all of these strategic growth initiatives while still reducing cash used in operations, which came in at just under \$1.0 million, despite putting these programs in place. We are maintaining our previously communicated expectation of cash used in operations in the fourth quarter of this year, which we believe will be approximately \$800,000.

“We believe these initiatives will transform our company, as we move away from being a single-play, U.S. neuro-navigation company, and emerge as a full-line neuro and spine therapy company, with products and partnerships for navigation, laser ablation, deep-brain stimulation, aspiration, gene therapy and more, treating some of the most complex and debilitating neuro disorders. This is an exciting time for employees at the company because of the opportunities ahead, and the positive impact we believe we are having on patients every day.”

### **Financial Results – Three Months Ended September 30, 2018**

Functional neurology revenue, which consists of disposable product commercial sales related to cases utilizing the ClearPoint system, increased 13% to \$1.4 million for the three months ended September 30, 2018, from \$1.3 million for the same period in 2017. The increase was primarily due to a 9% increase in ClearPoint case volume and a favorable number of DBS cases, which use two disposable kits per case.

Biologics and drug delivery revenues, which include sales of disposable products and services related to customer-sponsored clinical trials and services, increased 40% to \$191,000 for the three months ended September 30, 2018, from \$137,000 for the same period in 2017, due primarily to increased product sales.

Capital equipment and related service revenue, consisting of sales of ClearPoint reusable hardware and software and related services, decreased 45% to \$162,000 for the three months ended September 30, 2018, from \$296,000 for the same period in 2017. Revenues from this product line historically have varied from quarter to quarter and, we believe, have been adversely impacted by FDA warning letters to two laser system providers, causing the deferral of multiple capital equipment sales until resolution of the matters raised in the FDA letters.

Gross margin for the three months ended September 30, 2018 improved to 69% from 60% in the same period in 2017, due primarily to reductions in indirect manufacturing costs as a percentage of sales and more favorable revenue mix.

Research and development costs were \$617,000 for three months ended September 30, 2018, compared to \$590,000 for the same period in 2017, an increase of 5%.

Sales and marketing expenses were \$765,000 for the three months ended September 30, 2018, compared to \$899,000 for the same period in 2017, a decrease of 15%.

General and administrative expenses were \$1.1 million for the three months ended September 30, 2018, compared to \$867,000 for the same period in 2017, an increase of 20%. The increase was due primarily to increases in stock-based compensation, legal fees and directors' compensation, and to a decrease in activity-based cost allocation to other departments.

---

Net interest expense for the three months ended September 30, 2018 was \$247,000, compared with \$211,000 for the same period in 2017. The increase was due to increased amortization of the discount and deferred issuance costs associated with notes payable.

#### **Teleconference Information**

Investors and analysts are invited to listen to a live broadcast review of the Company's 2018 third quarter financial results today at 4:30 p.m. Eastern time (1:30 p.m. Pacific time) that may be accessed by visiting the Company's website at [www.mriinterventions.com](http://www.mriinterventions.com) and selecting "Investors" / "News" / "IR Calendar." Investors and analysts who would like to participate in the conference call may do so via telephone at (877) 407-9034, or at (201) 493-6737 if calling from outside the U.S. or Canada.

For those who cannot access the live broadcast, a replay will be available shortly after the completion of the call until November 19, 2018 by calling (877) 660-6853, or (201) 612-7415 if calling from outside the U.S. or Canada, and then entering conference I.D. number 413671. An online archive of the broadcast will be available on the Company's website at [www.mriinterventions.com](http://www.mriinterventions.com), on the "Investor Relations" page.

#### **About MRI Interventions, Inc.**

Building on the imaging power of magnetic resonance imaging ("MRI"), MRI Interventions is creating innovative platforms for performing the next generation of minimally invasive surgical procedures in the brain. The ClearPoint Neuro Navigation System, which has received 510(k) clearance and is CE marked, utilizes a hospital's existing diagnostic or intraoperative MRI suite to enable a range of minimally invasive procedures in the brain. For more information, please visit [www.mriinterventions.com](http://www.mriinterventions.com).

#### **Forward-Looking Statements**

Statements herein concerning MRI Interventions, Inc.'s plans, growth and strategies may include forward-looking statements within the context of the federal securities laws. Statements regarding the company's future events, developments and future performance, as well as management's expectations, beliefs, plans, estimates or projections relating to the future, are forward-looking statements within the meaning of these laws. Uncertainties and risks may cause the company's actual results to differ materially from those expressed in or implied by forward-looking statements. Particular uncertainties and risks include those relating to: the Company's ability to obtain additional financing; estimates regarding the sufficiency of the Company's cash resources; future revenues from sales of the company's ClearPoint Neuro Navigation System products; and the company's ability to market, commercialize and achieve broader market acceptance for the company's ClearPoint Neuro Navigation System products. More detailed information on these and additional factors that could affect the company's actual results are described in the "Risk Factors" section of the company's Annual Report on Form 10-K for the year ended December 31, 2017 which has been filed with the Securities and Exchange Commission, and the Company's Quarterly Report on Form 10-Q for the quarter ended September 30, 2018, which the company intends to file with the Securities and Exchange Commission on or about November 13, 2018.
